## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher A. Holland on October 21, 2005.

The application has been amended as follows:

In claim 1, line 15, "first" before "light bulb" has been changed to --second--;

In claim 22,

-line 3, "the" before "power source" has been changed to --a--;

-line 4, "a" before "power" has been changed to --the--;

-line 9, "control" has been changed to --controlling--.

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a vehicle light control module having, inter alia, a light intensity controlling means or switch connected to the first filament, the second filament, the headlight switch and the turn signal switch; said controlling means operating between an energized state, wherein said controlling means connects the first filament with the power source and optionally the second filament with the turn signal switch, and a non-energized state, wherein said controlling means connects the first filament with the turn

signal switch and the second filament with the headlight switch (claims 12, 22); or a first intensity switch connected between the dim filament of the first light bulb and the parking light switch and further connected between the bright filament of the first light bulb and the turn signal; said first light intensity switch connecting said bright filament of the first light bulb with the power source; and a second light intensity switch connected between the dim filament of the second light bulb and the parking light switch and further connected between the bright filament of the second light bulb and the turn signal switch; said second light intensity switch connecting said bright filament of the second light bulb with the power source (claim 1). The remaining claims 2-11 and 13-21 are allowed by virtue of their dependencies on the independent claims. Hence, the examiner has allowed claims 1 through 22.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Pabla et al., Patent No. 5,760,546 ; Kearney, Patent No. 3,277,442; Schofield et al., Patent No. 5,796,094.
